Education

 National Technological University	Full Stack Developer 2023	 University of Belgrano	Bachelor's degree in Audiovisual Communication 2010-2015	 Image Campus	Professional 3D Animation 2016
 Da Vinci	Professional 3D animation 2016	 IBM Acctg	Digital Squad Leader 2020	 Image Campus	Professional 3D modeling 2015

Experience

- 2021 – Present Bratislava, Slovakia

UX-UI Designer &
Developer

IBM

Design Process and Collaboration:

- Collaborate closely with researchers to gather insights, validate designs, and ensure alignment with user needs and expectations.
- Identify and troubleshoot UX issues, such as responsiveness, to ensure optimal user interactions.
- Incorporate customer feedback, usage metrics, and usability findings into design iterations to continually enhance user experience.
- Create user flows, wireframes, prototypes, and mockups to visualize and refine design concepts.
- Design of UI elements including input controls, navigation components, and informational displays to enhance user experience.
- Produce original graphic designs such as images, sketches, and tables to complement user interfaces.
- Effectively communicate complex technical concepts through storytelling to engage stakeholders in productive discussions.
- Proficiently utilize design and prototyping tools to transform concepts into tangible prototypes.
- Utilize software to visualize ideas, iterate rapidly, and refine solutions in accordance with project objectives and stakeholder requirements.

Agile Methodologies and Solution Delivery:

- Translate requirements into comprehensive style guides, design systems, and patterns, ensuring consistency and attractiveness in user interfaces.
- Provide layout design expertise for web automation applications.
- Collaborate effectively with product, development, and management teams to align design efforts with project goals and timelines.
- Utilize agile and design thinking practices to foster teamwork and expedite solution delivery.
- Lead and implement agile methodologies to streamline project workflows, ensuring adaptability to evolving requirements.
- Apply design thinking principles to drive innovation and problem-solving, fostering a collaborative environment conducive to creative ideation and solution development.
- Influence project outcomes through the application of human-centered design principles, prioritizing user needs and feedback to deliver intuitive and impactful solutions.
- Articulate complex problem spaces clearly and compellingly to facilitate understanding and drive decision-making among stakeholders.

Development:

- Develop user-centered designs by comprehensively understanding business requirements and incorporating user feedback.
- Offer guidance to DSLs on optimizing Web-Based Automation (WBA) solutions for accounting processes.
- Develop new components for the IBM Carbon component library to enhance product capabilities.
- Conduct thorough reviews of Process Design Documents (PDD) to identify and address potential errors that may impede process automation development.
- Develop of animated components and icons, followed by their integration into web pages.
- Design layouts for the Craft application and implement updates to enhance the visual aspects of the website, including design and front-end development.

- 2019-2021 Buenos Aires, Argentina

Branding, Advertising,
Communications

IBM

- Lead the global rebranding initiative for IBM Accounting, directing all aspects of design and implementation.
- Facilitate collaborative sessions with IBM representatives from diverse geographies to ensure precise execution of the new branding strategy.
